Press Release

Back Cove's largest design to date

Rockland, ME. March 28, 2013: Back Cove Yachts, based in Rockland, Maine, is pleased to announce their latest design, the *Back Cove 41* which will debut in February 2014.

Kevin Burns, Vice President of Design and Product Development says, "*The 41 was conceived from the onset to serve as the flagship of the Back Cove fleet. Clean, purposeful lines and naturally pleasing proportions dominate the profile and are supported by serious attention to the sculpted details that set today's Back Coves apart from their peers.*"

The focus of her balanced interior arrangement is on her two comfortable staterooms each with a private head. The centralized galley location serves the open air cockpit as easily as the salon. We intend the 41 to be unequaled in its class in terms of the efficiency of its operation, the thoughtfulness of its design, and the execution of its build.

The Back Cove 41 is the largest Back Cove to date and will be fitted with an efficient single Cummins 600hp diesel engine. The yacht will also be equipped with bow and stern thrusters, a generator set and reverse cycle heat and air conditioning systems are standard. The Back Cove 41 is designed for couples with serious cruising in mind.
